

2018 Bay of Plenty NZARM Conference Programme

Getting it done: Catchment, Implementation, Partnerships

The focus of the 2018 NZARM conference is about working together to get things done. We are all implementing great projects across a range of environments, whilst navigating the governance, ecological and political complexities. The key to success is having strong relationships in place and bringing people together to focus on collective aspirations. Come and enjoy the beauty that the Bay of Plenty has to offer, see first-hand some great projects made possible by partnerships and share stories about the importance of relationships in all of our work.
